

Welcome at the DiGiPORT Project's Newsletter

PROJECT DESCRIPTION

The DiGiPORT project aims to equip adult trainers and adult education organizations in order to enable them support CCS professionals and artists with developing the necessary digital and entrepreneurial skills that will allow them to ensure their sustainability and, also, to enhance their resilience towards similar challenges and crises. Moving onwards from the competences' development, the DiGiPORT project aims to develop and establish a pan-European online platform that will allow CCS professionals and artists to establish their own digital pop-up shops, through which they will be able to promote and disseminate their work and reach out to their target groups.

THE AIM OF THE PROJECT

The DiGiPORT project, recognizing the importance of CCS for the European and national economies and the significant challenges these sectors are facing due to the current Covid-19 crisis along with the major opportunities emerging for the sector through the exploitation of state-of-the-art technologies and digitization, will aim to equip CCS professionals and artists with the necessary digital and entrepreneurial skills that will allow them to ensure their sustainability and, also, to enhance their resilience towards similar challenges and crises. Moving onwards from the competences' development, the DiGiPORT project aims to develop and establish a panEuropean online platform that will allow CCS professionals and artists to create their own digital pop-up shops, through which they will be able to promote and disseminate their work and reach out to their target groups in times when venue based and physical activities are impossible to be organized and implemented.

Co-funded by the
Erasmus+ Programme
of the European Union

PROJECT ACHIEVEMENTS TO DATE:

KICK OFF MEETING ONLINE

DIGIPORT project partners met for the first time in December 2021 to discuss project management activities and tasks to be carried out in order to implement the main project results:

PR1: Training course on the development of CCS professionals / artists' digital and entrepreneurial skills

PR2: DiGiPORT online content platform and Creative Online Hackathon

PR3: DiGiPORT Toolkit for adult educators and adult education organizations

2ND PROJECT MEETING IN CYPRUS

CIP hosted the two days meeting and the agenda discussed among the partners covered all the next implementation steps for the project. More specifically, the partners analyzed the findings from the Synthesis report based on the CCS professionals / artists' needs. The report was conducted with the collection of data through Desk research and Field research (questionnaires & Interviews) in 6 countries. Following the report's conclusions, the partnership had drafted the core topics and the modules for the development of the training course focused on the entrepreneurial and digital skills for the artists.

Additionally, the functionality, the interface and the final version of the Digital Online Platform (PR2) was thoroughly discussed and useful feedback was given for the features. The platform will allow CCS professionals and artists to create their own digital pop-up shops, through which they will be able to promote and disseminate their work and reach out to their target groups in times when venue based and physical activities are impossible to be organized and implemented.

DIGIPORT project partners have put together the Synthesis report based on the CCS professionals / artists' needs which is available on the project's website.

The consortium has also developed a project result one which is a Training Course on the development of CCS professionals / artists' digital and entrepreneurial skills.

The training course is available on the project's website.
